Description

Boost your sales by installing this professional gift list module which allows offering wedding, birth, birthday presents or gifts for any occasion. As efficient as the big department stores, this complete and user-friendly module will simplify your life and make you save a lot of time.

Let your customers create and manage their gift lists on their own. They will be kept **inform of each purchase** on their list thanks to an **automatic email sending!**

Have access to a real **dashboard** which centralizes all the information of the lists and their purchases. No need to spread out papers and archives.

Data can be **sorted, filtered, and exported** in **PDF, excel** or **csv** format!

To communicate with your customers, **generate PDF** detailing gifts (who offered what and when), and with one click **send the PDF by email** to your customer.

Finally, people who want to offer gifts will easily **find the list** of their choice **by an alphabetical name search**, or via a direct link displayed in an email sent by the shop.

As a merchant

Easy installation

Installation is quick and easy, **without changing the core** of PrestaShop. An **installation wizard** will guide you, and even offers to **import data from the old module** Prestashop gift list!

Simplify your life

Get everything you need to manage your shop and the gift lists:

- **quick access** to the module configuration (« quick access » button)
- **list of orders** with lists of gifts for a selected period
- **list of gift lists** for a selected period, with date event
- analysis of each gift list with total purchases, **detail of orders and products purchased** and the remaining
- automatic **email** sending after every creation of a **new list**
- automatic **email** sending after every gift **purchase** (incl. PDF)
- authorize list creation – **authorize your customers to create** one list with or without your permission
- allow creators of the list to decide whether or not to allow donators to view and use the **owner's list address** when offering a gift
- display the **list name** and **list's owner** on **PDF invoice** and at the top of the **order back office page**
- allow **welcome pictures** to be uploaded by your customers or upload by yourself pictures
- activation/**deactivation of a list** : you can deactivated a list and it will not be available for gift
- distinction between **paid orders status** and “all status” orders

Increase productivity

In one or two clicks, get access to all information of gift lists.

To be well prepared for an appointment with a client who created his/her list, save time by **knowing immediately who bought what and when**, what remains on his/her list, what is the total of donations...

You can also directly have access to the back office of the order or a product by clicking on specific icons displayed on the page.

Satisfy your customer (who created a list)

- Propose a **user-friendly** and complete interface
- Enable **social network sharing**
- Enable donators to **use delivery address** of lists creators
- Enable **welcome picture** on list page
- Enable list attributes like **event date**, type of list, etc.
- Enable to **rename the list**
- Enable to protect the list with **password protection**
- Send him/her the **PDF summary by email** in two clicks to provide an update on the purchases of his/her list, view the content of the email before sending it, and receive a copy of this email if you wish.

Adapt to each situation

- Issue information about lists in multiple formats. Whether you are at your desk, on the ground preparing orders or in a meeting with a client, take advantage of many available output formats (**PDF, monitor, printer, csv, excel**).
- **Empower** all / some of your clients to **create their lists**

As the creator (of a gift list)

Use every functionality with ease

An **online manual** guides you in creating your gift list, as well as mouse-over **context-sensitive** help icons.

Communicate quickly address list

- **Share** your list on **social networks** via AddThis (Facebook, Tweeter, Google Plus)
- Send an **email invitation** to your friends, customize it and view it before sending.
- Get the **web link** of your list and send it by e-mail
- Or propose the **name search**

Manage the list

- Add a product to a list without having created a list: **automatic list creation**
- Receive an **email to confirm the creation of your list**
- Add **welcome message** on your list page
- Add **welcome picture** on your list page
- Set up **event date**, type of list, etc.
- **Rename** the list
- Enable donators to **use your delivery address**
- Protect the list with **password**
- **Publish** your list when you are ready: it will be **available for buying products** and displayed in search list results.
- **Prioritize** your products, up to 5 levels to sort products
- **Add** or **remove** a **product** at any time, and set up the wished **quantity** by product

Know in real time

- **who gave you and what**, either on screen or in a pdf
- **messages** from your friends

- the **quantities** offered, and the remaining quantities
- **thank easily donators** by clicking their direct email link

As a donor (to offer a gift)

Find a list easily

Search for a list by name of its creator or the list name, without having to find the mail featuring the link

Offer

- Being welcomed by the **welcome picture and message** posted by the creator
- **Leave a message** (of congratulations for example) to the recipient of the gift when buying
- **Select the list's owner address** when you check out

Enjoy Prestashop

Take advantage of the functionalities of Prestashop about the **payment** and **data security**

Install and configure the module (back-office)

- ✓ **IMPORTANT : remove any performance cache smarty settings and CCC parameters before installing the module. You will set them back afterwards.**

Exemple of performance recommended settings (Prestashop 1.5x here) to install the module.

Advanced Parameters > Performance

Smarty

Template cache Never recompile template files
 Recompile templates if the files have been updated
 Force compilation

Cache

Should be enabled except for debugging.

CCC (Combine, Compress and Cache)

CCC allows you to reduce the loading time of your page. With these settings you will gain performance without even touching the code

Smart cache for CSS Use CCC for CSS.
 Keep CSS as original

Smart cache for JavaScript Use CCC for JavaScript.
 Keep JavaScript as original

Minify HTML Minify HTML after "smarty compile" execution.
 Keep HTML as original

Compress inline JavaScript in HTML Compress inline JavaScript in HTML after "smarty compile" execution
 Keep inline JavaScript in HTML as original

Download the module

Versions Prestashop 1.5 and >1.5

Connect to back-office

Click “Modules” sheet,

- ✓ “add a module from my computer”

Module : List of modules

- ✓ In the section “module file” select the zip file of the module “blockgiftlistpro.zip”
- ✓ “upload this module”

A form titled "Add a new module" with a sub-header "Add a new module". It contains the text "The module must either be a zip file or a tarball." Below this is a "Module file" section with a file selection button labeled "Choisissez un fichier" and the text "Aucun fichier choisi". Underneath is the instruction "Upload a module from your computer." and an "Upload this module" button.

Install the module

- ✓ Click “Install”

A module card for "Giftlist Pro" with a gift icon. It shows a "NOT INSTALLED" status. The card includes the text: "Developed by : Alize Web | Version : 1.131 | Category : Front Office Features" and "Description : Add a block containing the customer's giftlists. Information and dashboards about giftlists, PDF and e-mails." There are also links for "Delete" and "Mark as Favorite".

Comment

Should you encounter any problem, please unzip the module file, copy and paste the directory in the “modules” directory.

Configure the module

Click “configure”

A module card for "Giftlist Pro" with a gift icon. It shows an "INSTALLED" status. The card includes the text: "Developed by : Alize Web | Version : 1.131 | Category : Front Office Features" and "Description : Add a block containing the customer's giftlists. Information and dashboards about giftlists, PDF and e-mails." There are also links for "Configure", "Disable", "Reset", "Delete", and "Mark as Favorite". The "Configure" link is highlighted with a red box.

Tip

You can access the module configuration by clicking its link in Quick access area:

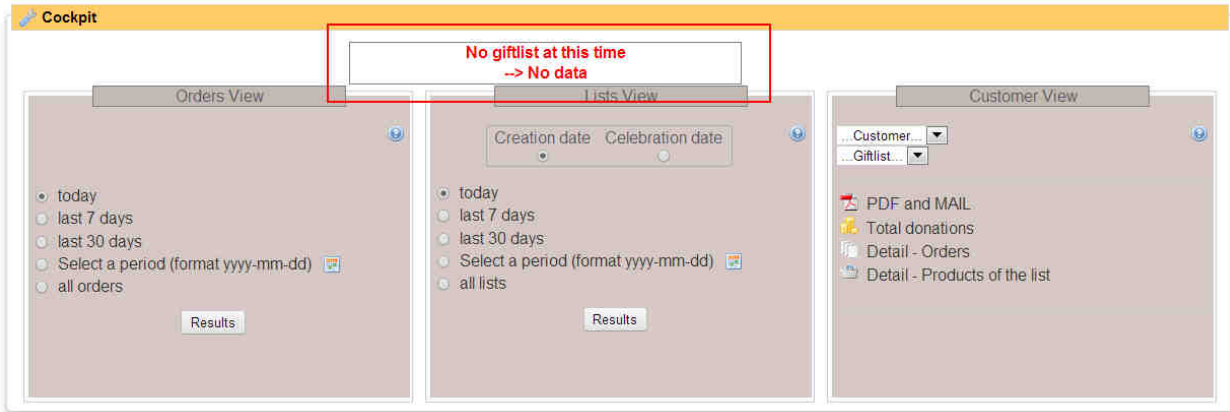

Installation message – Data recovery

Case 1

The native prestashop module “**Wishlist block** by *PrestaShop*” (blockwishlist) has not been installed. You don't have anything to do, just wait for wishlists and purchases!

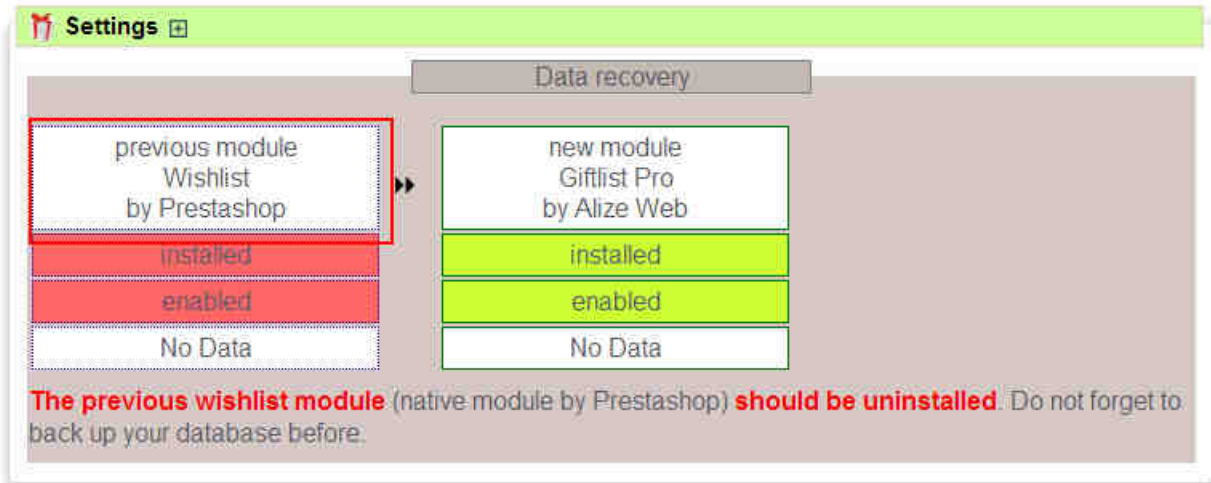

- > Information: no data at this time because no list created and no purchases.

Case 2

The native prestashop module (blockwishlist) has been installed and no wishlists have been created (no data).

- > Information [1] : The native prestashop module should be uninstalled.
- > Information [2] : Nobody has offered gifts at that time (“(No Data”).

Comment

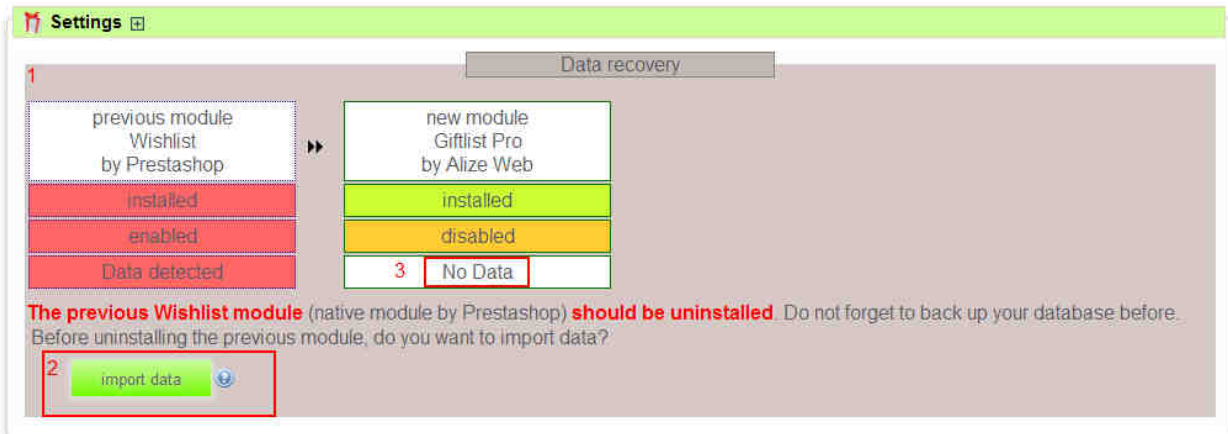

To uninstall the native prestashop module please connect to the back office, click on the “modules” tab, select the line of the native module by Prestashop (**Wishlist block** v0.2 by *PrestaShop*) and click « uninstall »

Case 3

The native prestashop module (blockwishlist) has been installed and some wishlists have been created (data detected).

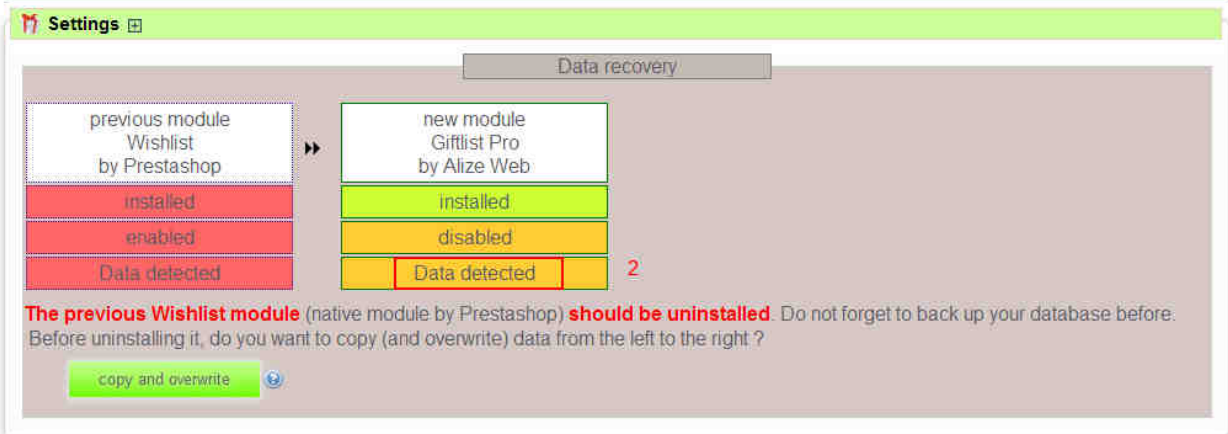

- > Information 1: The native prestashop module should be uninstalled. Caution: should you want to keep your previous lists and view and manage them in the new module please use “import data” displayed on this screen.
- > Information 2: Some lists have been created (“data detected”). Before proceeding to uninstall the native module (refer to the point below) and if you may want to import these lists in the new module (“import data”) please do not forget to import data first.
- > Information 3: No list has been created at this time. Hence there isn’t any data regarding Giftlistpro.

You can now see the following display:

Giftlist Pro - 1.131

[Help - User guide](#)

Now you have to **uninstall the native prestashop module** (Wishlist block v0.2 by PrestaShop).

Click “Back” and come back to module configuration by clicking “configure” as below:

Module **blockgiftlistpro** **Back** Manage hooks Manage translations

 **Giftlist Pro** **INSTALLED**

Developed by : Alize Web | Version : 1.131 | Category : Front Office Features

Description : Add a block containing the customer's giftlists. Information and dashboards about giftlists, PDF and e-mails.

[Configure](#) [Disable](#) [Reset](#) [Delete](#) [Mark as Favorite](#)

Case 4

The Wishlist Pro module by Alize Web has been installed and no wishlists have been created (no data).

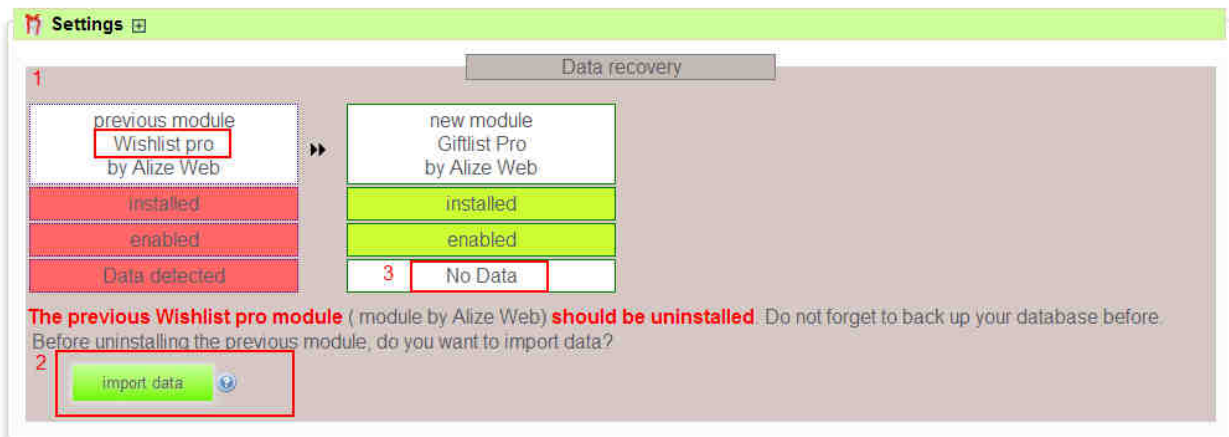

- > Information [1] : Wishlist Pro module should be uninstalled.
- > Information [2] : Nobody has offered gifts at that time (“No Data”).

Case 5

The Wishlist Pro module by Alize Web has been installed and some wishlists have been created (data detected).

- > Information 1: Wishlist Pro should be uninstalled. Caution: should you want to keep your previous lists and view and manage them in the new module please use “import data” displayed on this screen.
- > Information 2: Some lists have been created (“data detected”). Before proceeding to uninstall the Wishlist Pro module and if you may want to import these lists in the new module (“import data”) please do not forget to import data first. Click “import data”.
- > Information 3: No list has been created at this time in Giftlistpro. Hence there isn’t any data regarding Giftlistpro.

And then you can see the following display:

Giftlist Pro - 1.131

Help - User guide

Table ps_1560giftlist_pro : data successfully imported
Table ps_1560giftlist_email_pro : data successfully imported
Table ps_1560giftlist_product_pro : data successfully imported
Table ps_1560giftlist_product_cart_pro : data successfully imported
Recovery carried out.

The previous **Wishlist pro** module (module by Alize Web) **should be uninstalled**. Do not forget to back up your database before. Before uninstalling it, do you want to copy (and overwrite) data from the left to the right ?

copy and overwrite

Do not forget to **uninstall Wishlistpro** module.

Settings

Setting 1: Automatic e-mail sending settings

Automatic e-mail sending

▶ after every gift purchase (incl. PDF) to the creator of the list Receive a copy of the e-mail

▶ after every creation of a new list to the creator of the list Receive a copy of the e-mail

Save

- after every gift purchase
Creators of a gift list may want to **be informed** as soon as **someone offers them a gift** from their list. Giftlist Pro features this functionality. An **automatic e-mail** will be **sent to the creator of a giftlist** when someone purchases a gift. A pdf is included and details gifts, name of donators and their messages.
As a merchant, select “receive a copy of the mail” if you wish to receive a copy of the automatic e-mail sending.
By default automatic e-mail sending is activated and copy to the Shop is disabled.
- after every creation of a new list
According to your choice you can enable **email sending after each list creation**.

Comment

An e-mail including a pdf summary can be sent by the merchant at any time. Please refer below to the section Dashboard of the module / customers view / PDF and EMAIL.

Setting 2: Welcome picture

Giftlistpro enables to upload welcome pictures.

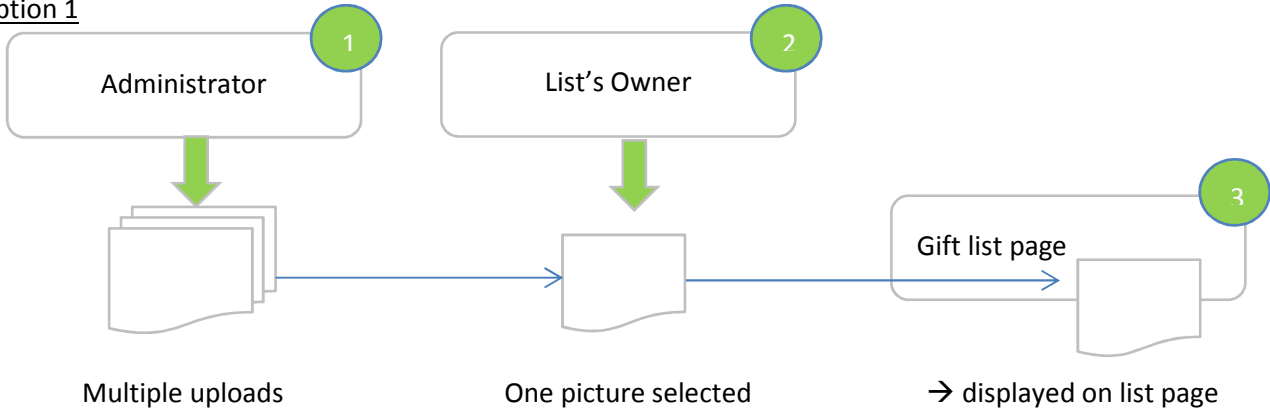

There are three options.

Option 1 → you upload several pictures among those the creator will select his own.

Option 2 → the creator can upload whatever he wants as a welcome picture.

Option 3 → No pictures uploaded / displayed

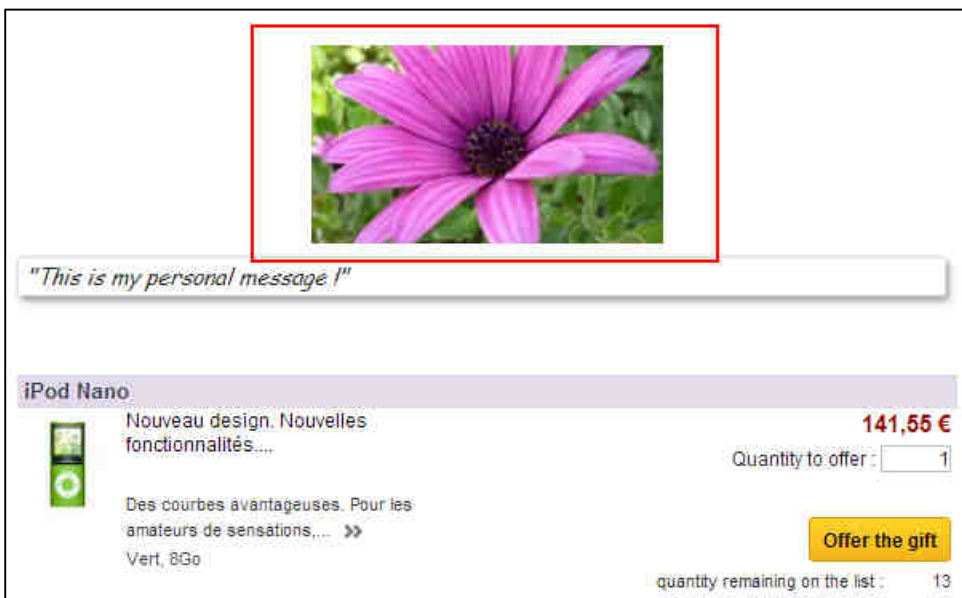

Option 1

Option 2

The welcome picture will be displayed at the top on gift list page:

To manage welcome pictures settings, please refer to Miscellaneous section:

Miscellaneous

Welcome picture uploaded by your customers
▶ The creator of the list can load a welcome picture to be...
Security Caution: Allowing users to upload pictures is an element of security. Like local .htaccess directives. By activating pictures upload, you recognize that you do it at your own risk.

Welcome picture uploaded by Administrator
▶ YOU upload your own pictures. The creator of the list will...
Security Caution: Uploading pictures is an element of security. By activating pictures upload, you recognize that you do it at your own risk.

Option 2

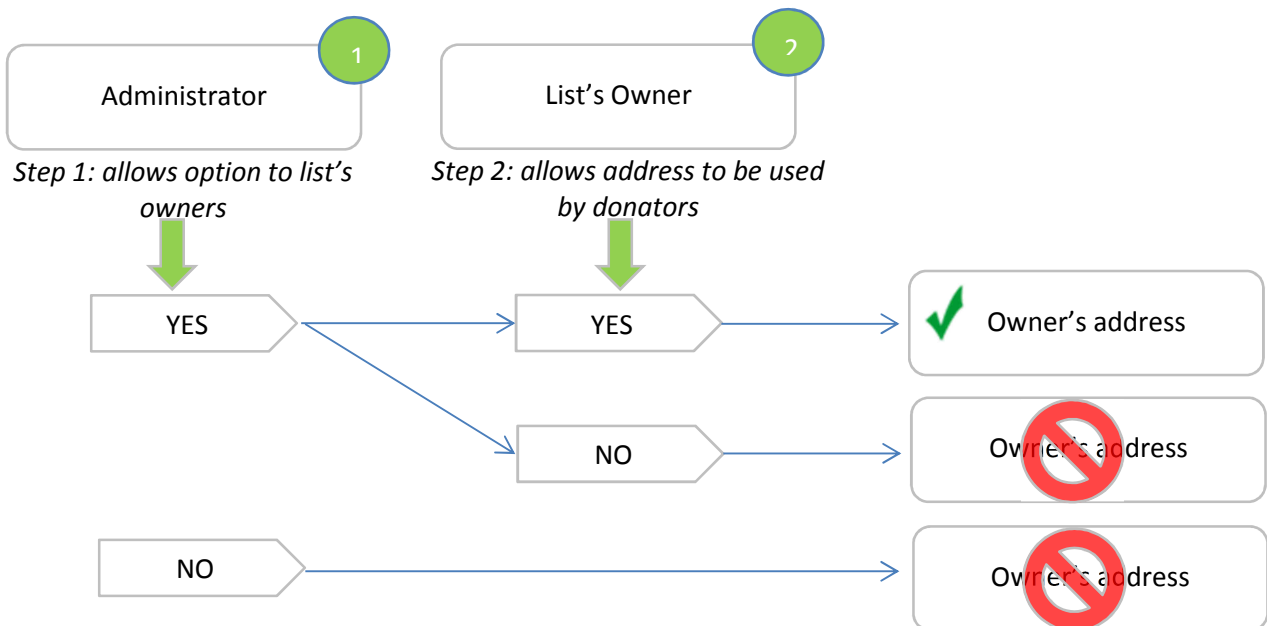

Option 1

Please read carefully security warnings. Option 1 is of course safer.

Setting 3: Creator's address settings

Not compatible with the guest checkout method.

This is a 2-step process for data privacy reason.

- Firstly at back office level, you allow (or you don't) your customers to have the choice to let their address to be used by donators.

Miscellaneous

Owner's list address

▶ The creator of the list can allow donators to view and use the owner's list address possible with the guest checkout method)

- If you select Yes , creators will see the section below when creating a new list and it's up to them to decide whether they allow donators to use (and see) their address.

Global setup & New list - Creation and directions for use ✕

1. Global setup

 *Allow your address to be public*

If you select this option, every people who offer you some gifts can see your address and may use it as the delivery address. Please note that your choice will apply to all your lists.

- Allow donators to **use your address** as the delivery address ?

yes no

Confirm Global Setup - Delivery Address

(displayed on creator list page)

Setting 4: Enabling list creation

You may want to brief your customers before they can create their own list. Click the green mark to enable this feature.

Miscellaneous

List creation - authorization

▶ Your customers can create a list without the permission of the administrator

Your customer can see the warning when he wants to create his list:

🏠 > My account > My lists

My giftlists

Global setup & New list - Creation and directions for use ✕

Please contact the shop first to be allowed to create a list.

Once you have saved your setup, please select customers on the section below:

Translate the module

To translate the module please connect to Prestashop back office/Localization/Translations and select "installed modules translations"/"Core" and click the appropriate flag.

Localization > Translations

Modify translations

Here you can modify translations for every line of code inside PrestaShop.
First, select a section (such as Back Office or Installed modules), and then click the flag representing the language you want to edit.

Installed modules translations

Caution: we strongly recommend to avoid inserting simple or double quote (like ' or ") into the translated field. In some cases it could prevent Javascript code of the module from working properly.

Tip: once translated with quote, you can verify the code thanks to the console app of Chrome or Firefox.

Dashboard of the module (back office)

Access the back-office

To access the back office of the module click “configure” on the line “Giftlist Pro” in the list of modules or take the quick access tip:

Comment

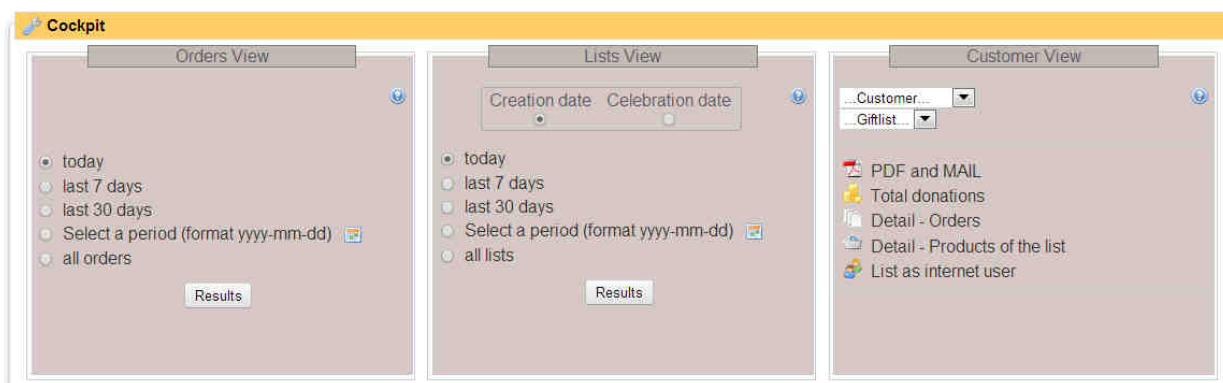

Note that you can hide settings if you want to go to the Cockpit as quickly as possible:

Giftlist Pro - 1.131

Find out all data regarding the wishlists in the cockpit section.

For instance you may want to get the orders of the day placed through giftlists (block « orders view »). Or print the pdf of products bought on the list of one of your client before an appointment with him (block « customer view »).

Orders view : orders of wishlists over a period

By selecting the period (for example “last 30 days”) the list of orders of wishlists over a period is displayed. The list can be exported or printed out.

Create and manage a list

Log in (or create your account if need be) to be able to create a list.

Add products without creating a list

If the customer clicks “add to my list” on a product page before having created his list, a **new list will automatically be created**. The default name is “My gift list”. The name can be changed by his own later on.

Create the list

The customer may also create his list before adding any products to it.

- ✓ Click “my wishlists” in the “My account” block

- Or click “manage my list” in the giftlists block

- ✓ Then click “New wishlist – Creation and directions for use”

Creator’s delivery address

Enable to use the creator’s address as the delivery address

Caution : not compatible with “guest-check out”.

Prerequisite: option to be activated in back office. In this case the section below will be displayed on creator’s management page:

Set up delivery address

It's up to list creators to decide whether they allow donators to use (and see) their address and select which address they want to be used. This choice will apply to all their lists.

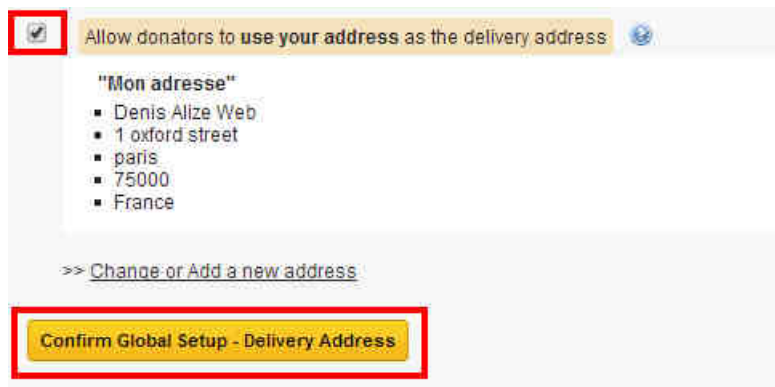

The donator will be able to pick up this address when he checks out. dresses.

Case 1

No address at customer account level:

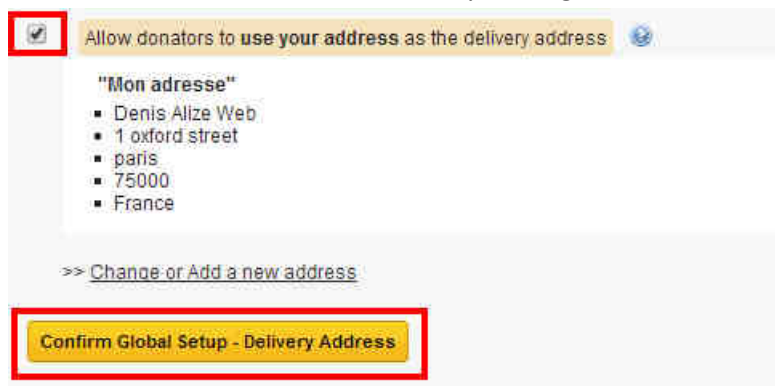

1. Go to your account and create an address
2. Come back to your lists management
3. Check [Allow donators to ...]
4. Validate the address by clicking [Confirm Global Setup]

Case 2

An address has already been registered at account level and it does suit you.

1. Check [Allow donators to ...]
2. Validate the address by clicking [Confirm Global Setup]

Case 3

The defined address doesn't suit.

1. Go to your account and change the address or add a new one
2. Come back to your lists management
3. Refer to case 2 above

Case 4

Many addresses are registered in your account.

1. Check [Allow donators to ...]
2. Select the address
3. Save your choice by clicking [Confirm Global Setup]

Allow donators to use your address as the delivery address

Select an address: Mon adresse

Comment about "bought quantities"

- Bought quantities displayed on this page are based on paid orders, and don't include cancelled orders or orders waiting for payment.
- On the "list page" (to offer gifts) left quantities are based on confirmed orders. So the left quantities displayed on the list page may be inferior to the left quantities on this page. For example this is the case of an order paid by cheque but the cheque has not been cashed yet.

Comment about "delete"

Only available provided that no purchases have been placed on that product.

3. Look at gifts

Communicate your list

In addition to the option “send the wishlist address” described above it is possible to find out a list by entering

- either the creator’s name into the “list block”,
- or entering the name of the list.

The screenshot shows a web interface for 'GIFTLISTS'. At the top, there is a dark header with the text 'GIFTLISTS' in white. Below the header, the text 'Offer a gift' is displayed. Underneath, there is a search prompt 'Search for a list by name' followed by a text input field. The input field is highlighted with a red rectangular border. To the right of the input field is a magnifying glass icon. Below the input field is a yellow button labeled 'validate'. Below the 'validate' button is a horizontal line, and below that line is another yellow button labeled 'Manage my list(s)'.

Hence you just have to communicate the name of the e-shop to your friends.

Offer a gift

Find out and display the list

To offer a gift, please go to the web page of the list either by searching the list by name (name of the list or lastname of the creator; or part of it) or by clicking the direct link you may have received.

- Search by name (either creator's name or list name)

Information about quantity remaining on the list

Please note that this number takes into account paid orders but also waiting for payment orders and quantities in carts not already ordered.

Check out

- ✓ Click “check out” in the cart block

- ✓ Create your account or log in
- ✓ Click 'Pick up in-store' in the carrier section to cancel shipping costs.
- ✓ Choose your payment method and confirm your order.

Gift coupon

Use

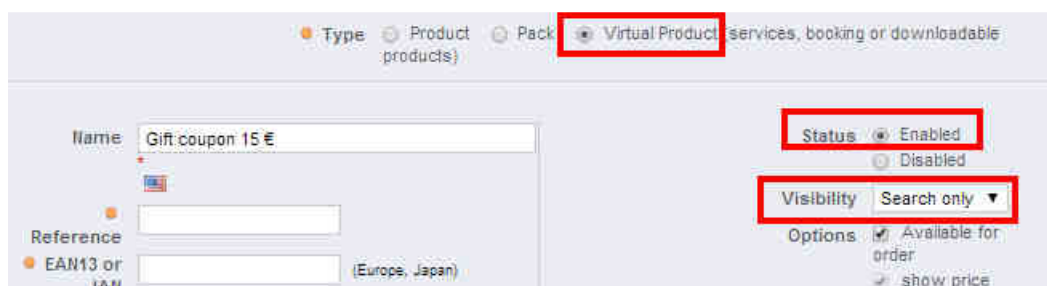

Some of your customers would like to add gift coupons to their list. The objective is to let donators

- feel free about the list because they may not want to choose a specific product in the list
- fix the amount of the gift accurately

This is **like a contribution**. At the closure of the list, you will generate a credit slip to refund this total to your client who has created the list.

Create a gift coupon

- First create a new product called « gift coupon » defined as a virtual product. Set the price (for example 10€) and add a new image by selecting the « gift.gif » file in the modules/blockgiftlistpro directory.
- When creating his list your customer could add this gift coupon as a product. It is advised to choose “top” as priority to display it on the top of the web page (top=first).
- And also to set an important quantity, for instance 1000. There will always be quantities left.
- The donator will purchase this product as everyone else.

On quantities sheet:

When out of stock Deny orders
 Allow orders
 Default: *Deny orders* as set in Preferences

On virtual product sheet:

| | |
|------------------------|--|
| Information | Virtual Product (services, booking or downloadable products) |
| Prices | |
| SEO | Does this product have an associated file? <input type="radio"/> Yes <input checked="" type="radio"/> No |
